Race Recording Instructions.

TO ENSURE YOU HAVE ALL THE DATA REQUIRED TO CALCULATE RACE RESULTS, READ THE COLUMN HEADINGS AND ENTER DATA ACCORDINGLY

With reference to the sample Recording Sheet on the right->

- Under **'Helms Sailing Non-registered Boats'** enter the details if any crew calls them out
- Under **'Race Data'** enter the details as they become available.

No further action is required until the end of the first Lap when-

- In the columns under **'Record at End of First Lap'** enter the dinghy class and **FULL (Important)** Sail Number of each boat as it passes through the start/finish line.
- **NOTE- It is important to record the rig variant (size) of any Byte, Aero or Laser racing.**

During the race you should tick off boats as they complete each lap, this will give an indication of any boat which has retired or not sailed the same number of laps as the leading boat..

At the end of the race-

- **NEVER try to read sail numbers across from the 'Enter FULL Sail Number' column. Enter 4 digit sail numbers in time and finishing order**
- In the columns headed **'Record at End of Race'** enter the Sail Number (4 digits only) and accurately record the finishing time of each boat as it crosses the line..
  NOTE- See 'Recording a multi bat (Group) Finish' below.
- To assist in transferring times to the computer, as an aide memoire, in the 'H or L' column you can enter whether the finisher is Handicap (H) or Laser (L).

NOTE- Entries in the 'Record at End of Race' columns are the reference data for calculating results, they MUST be entered in time and finishing order..

Recording a multi boat (Group) Finish

There will be an element of interpretation in recording times in a multi boat finish**.**

1- Record the sail number (Last 4 digits) and time of the first boat the group.
2- Record the sail number of ALL the others. (As you will be pressed for time you need only record the last two digits of a sail number in a group)
3- Do NOT attempt to time all boats in the group, but if possible time the last boat.
4- This record can then be used to interpolate a time for each finisher.

Updated- 18/05/23
